Dr. C. D. Deshmukh Commerce and Sau. K. G. Tamhane Arts College
Roha- Dist. Raigad

Maintenance of Water bodies and distribution System in the campus:

The college has committed to manage all the water related field activities. Water is the fundamental requirement of life. A water management policy is required to assure the quality of water distributed from the unique sources of water conservation system. The planning and execution of water resources development have by and large been carried out. Water conservation is an integral part of ensuring an adequate water supply across the campus, now and in to the future. It is the least expensive strategy for meeting of our needs and should be the first choice for communities to protect their local water resources.

The Water pumped from the lower tank to the overhead tank an upper tank is distributed to all taps across the campus. The maintenance of plumbing system is outsourced. Whenever the problems are identified immediate action are taken for restrict wastage of water. Then plumbers are outsourced to fix the problem.
